IP20

Short-time timer

COUNT-DOWN TIMER 15-75MIN IP2

Short cycle timer

Description of product family

The easy-to-use short-time timer allows you to control the power supply from a socket to an electrical device. Set the desired usage time on the timer by pressing the button. Each press adds 15 minutes to the device’s runtime. The remaining runtime of the connected device is displayed as illuminated segments along the edge of the timer plug. The timer cuts off power to devices that shouldn’t be left on, such as an iron or coffee maker. Also suitable for mobile phone chargers. Packaged in a recyclable cardboard box that can be displayed on a peg or shelf.

Technical details

An easy-to-use timer for controlling power supply from a socket to an electrical device. Set the device's operating time by pressing the timer button. Each press increases the operating time by 15 minutes, up to a maximum of 75 minutes. The operating time is displayed as illuminated segments on the edge of the timer socket. Ideal for use with devices like an iron or a coffee maker.
