

Haaga

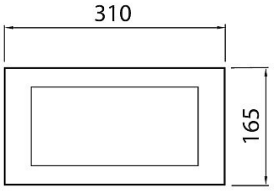

Haaga IP44 E27 PCO WH

Wall luminaire

Description of product family

The surface-mounted Haaga wall luminaire serves as a general light fixture as well as the number light on the side your building. The sleek design helps the lamp fit into its surroundings perfectly. The house number can be attached to the luminaire with the included black number stickers (3 x 0–9). The owner of a property is responsible for having an address number sign that can be seen from the street even in the dark in case an ambulance might need to see it, for example. For the light source, we recommend a LED bulb with an E27 base.
