

Käpylä Bollard

Käpylä Bollard IP44 E27 WH H1100

Bollard luminaire

Description of product family

The classic and timeless Käpylä luminaires are a great solution for lighting pathways and plantings in yards and gardens. The glass dome protects the bulb and steers the light both upwards and downwards through the body's steel rings. Install together with a concrete base and a support tube (4107058), or choose a ground support tube (4107104) that can be sunk directly into the ground. To create a harmonious look for your yard, complement the Käpylä bollards with Käpylä wall luminaires.

Technical details

Käpylä bollard light is perfect for yards and gardens, height 1 100 mm. Steel frame and rings, color white. A beautiful clear glass globe. LED bulb not included in the package, max. 11 W E27 base. Not suitable for chaining. Ground supports for installation sold separately.
