LED tubes

LED T8 600 840 G13 1350lm

Description of product family

Airam LED tubes are long-lasting. LED tubes provide improved light quality and high luminous efficiency, especially in cold conditions. The tubes can be directly replaced with fluorescent tubes using the supplied LED starter. LED tubes are also suitable for luminaires designed specifically for them. Short LED tubes (59 cm and 43.8 cm) are not suitable for connecting two lamps via a single ballast. If the luminaire includes a compensation capacitor, removing it improves the power factor (PF).

Technical details

**Opal T8 LED tube with G13 base. Power 9 W, cool white colour temperature 4000 K, 1350 lm, lifetime approx. 25,000 h. Dimensions Ø 26 × 604 mm, carton. LED starter (short-circuit starter) included. The tube is not suitable for twin-tube luminaires where the lamps share a common ballast. Frequency ~50/60 Hz. Operating temperature range -30 to +40 °C. Good colour rendering index CRI > 80. Continuous, even light spectrum with no colour distortion. No UV or IR radiation. Mercury-free. Three-year warranty.
