Red Klassikko

RED THERMOS BOTTLE 1.0 L

Thermos Bottles

Description of product family

The traditional red Airam Klassikko thermos bottle has been a staple in Finnish homes since 1934. Keeps cold drinks cold and hot drinks hot — a promise that still holds today. The iconic exterior has remained nearly unchanged for decades. The bottle's outer shell is made of metal and plastic, while the inner bottle is glass. The benefit of a glass liner is that it does not absorb unwanted flavours, such as coffee.
