Grow Light

LED PAR20 835 400lm E14 PLANT OP

Promotes plant growth

Description of product family

In the dark Nordic winter, houseplants need additional light from November to March. Grow lights are designed to meet the specific light requirements of plants, with red and blue wavelengths being the most important for growth. By enhancing these wavelengths, plants grow stronger and develop better height. Grow lights are not intended for general room lighting, as some models in the range emit a strongly reddish light. Technical specifications and light colour are clearly indicated on the packaging.

Technical details

PAR20 LED grow lamp. Power 6.2 W, white colour temperature 3500 K. E14 base, 400 lm, 1350 cd, beam angle 40°. Lifetime approx. 25,000 h. Dimensions Ø 63 × 90 mm. Carton. Frequency ~50/60 Hz. Light spectrum optimised for efficient plant growth. Does not generate heat that could damage plants. No UV or IR radiation. Mercury-free. Three-year warranty.
