Rose

PLANT LIGHT ROSE 10W/735 290LM USB

Grow light

Description of product family

The dark Nordic winter can be challenging for houseplants. Improve plant growth with the practical Rose grow light featuring a fixed LED light source. The height of the stem is adjustable. The stem can be inserted directly into the soil or attached to the edge of a plant pot using the screw clamp. Light output can be adjusted in steps, and the product also features an automatic three-stage timer. Select the desired timer setting using the button on the cable: 8 h (on 8 h / off 16 h), 12 h (on 12 h / off 12 h) or 16 h (on 16 h / off 8 h). The timer controls both on and off cycles. To change the timer setting, reset it by briefly disconnecting the light from the power source. The light operates via USB connection; a USB-A power adapter is not included.
