

LED tubes

LED T8 438 840 G13 900lm

Description of product family

Airam LED tubes are long-lasting. LED tubes provide improved light quality and high luminous efficiency, especially in cold conditions. The tubes can be directly replaced with fluorescent tubes using the supplied LED starter. LED tubes are also suitable for luminaires designed specifically for them. Short LED tubes (59 cm and 43.8 cm) are not suitable for connecting two lamps via a single ballast. If the luminaire includes a compensation capacitor, removing it improves the power factor (PF).

Technical details

Opal T8 LED tube with G13 base. Power 5.4 W, cool white colour temperature 4000 K, 900 lm, lifetime approx. 25,000 h. Dimensions Ø 26 × 438 mm, carton. LED starter (short-circuit starter) included.
