Smart Siren

SMART SIREN

Description of product family

Connect the wireless Smart siren to the Airam SmartHome app, and use it to set up rules with other SmartHome products. For example, you can connect the siren to the Smart door sensor that will sound an alarm if the sensor detects that the door is open. We will extend the Airam SmartHome product family to other home security products in the near future. Using the app, you can connect the siren to various SmartHome products and set up rules between them to further increase the security of your home. You will have almost unlimited options to make use of the siren and connect different SmartHome products! Please note that the siren is an accessory in your security system, and should not be used as a replacement for a smoke alarm or water leak sensor. Download the Airam SmartHome app from the Google or Apple app store. Adding new SmartHome products to the app is simple. They can make even an older house into a smart home.
