Smart Water Alarm

SMART WATER LEAKAGE ALARM

Description of product family

You can use the Airam SmartHome water leak sensor with or without the Airam SmartHome app. The bottom of the sensor contains two probes that activate a loud alarm when detecting water. If the sensor is connected to the Airam SmartHome app, also the app will alert you. The sensor will not prevent the water leak, but it allows you to react promptly and alert help to your home, even when you are not there yourself. You can connect the water leak sensor to the Smart siren and set up a rule between the two devices where, in the event of water leak, both the siren and the sensor will alert you.
