Bicycle Front Light

BIKE FRONT LIGHT 1x3W + 6 LEDS

Description of product family

Bicycle front light with a quick-release mount. The light can be rotated 180°, and both ends include lights for different applications. When driving along a dark road, you can use the effective 3W headlight, whereas the less intensive 6 LED light is more suited for built-up areas where the brighter light could produce unwanted glare.

Technical details

This bicycle front light features two light sources at opposite ends, designed for different types of riding—simply rotate the light 180° as needed. It includes a powerful 3W LED for suburban or off-road use, and a 6-LED array for urban riding. The LEDs are non-replaceable and provide up to 150 lumens of brightness. Light modes include 100%, 30%, flashing, and off. The light is powered by 3 × AAA batteries (not included). The body is made of plastic and comes in a grey and black color scheme. Quick-release mounting makes installation easy.
