Novea

NOVEA THERMOS JUG 1,0L WHITE

Thermal Carafe 1 L

Description of product family

Novea is a stylish thermal carafe suitable for both everyday use and festive occasions. It features a straight, practical design and a screw-top lid with a convenient push-button for easy pouring. The carafe is made of plastic with a glass liner. The advantage of glass is that it doesn’t retain flavors – your drink always tastes fresh. The glass liner must be cleaned gently, and usage instructions followed carefully. If the liner is damaged, the product must not be used. Suitable for both hot and cold beverages. Available in black or white. For best heat retention, we recommend pre-warming the liner with hot water – this helps keep coffee hot for up to six hours!

Technical details
