Vivea

VIVEA THERMOS JUG 1,0L WHITE

Thermal Carafe 1 L

Description of product family

Vivea is a thermal carafe suitable for both everyday and festive table settings. The outer body is made of plastic, and the inner liner is glass. The benefit of a glass liner is that it doesn’t retain flavors – your drink always tastes fresh. The glass insert requires gentle cleaning, and usage instructions must be followed carefully; if the insert is damaged or broken, the product must not be used. Suitable for both hot and cold beverages. Available in black or white. For best performance, we recommend pre-warming the glass liner with hot water before filling.

Technical details
