Grow Light

LED A60 840 1100lm E27 PLANT OP

Promotes plant growth

Description of product family

In the dark Nordic winter, houseplants need additional light from November to March. Grow lights are designed to meet the specific light requirements of plants, with red and blue wavelengths being the most important for growth. By enhancing these wavelengths, plants grow stronger and develop better height. Grow lights are not intended for general room lighting, as some models in the range emit a strongly reddish light. Technical specifications and light colour are clearly indicated on the packaging.

Technical details

Standard LED grow lamp 9W, color temperature 4000K, E27 base, 1100 lm, lifespan approx. 15,000 h, size ø 60 x 112 mm, corrugated cardboard packaging. Spectral distribution designed for effective plant growth. Does not heat plants. No UV or IR radiation. Mercury-free. Three-year warranty.
