GaN quick charger 65 W

QUICK CHARGER 65W

Description of product family

The compact and lightweight charger utilizes GaN technology. The 65-W GaN PD quick charger allows you to charge your laptop or even multiple mobile devices at the same time. The charger features two USB-C ports and one USB-A port. GaN (gallium nitride) is a crystalline semiconductor material. Components manufactured from gallium nitride can withstand higher voltages and current than those made from silicon. GaN also offers excellent conductivity and resistance against high temperatures. This means that a smaller charger can be used to provide more power, while also increasing the useful life of the charger.

Technical details

65 W GaN PD -quick charger. 2 x USB-C, 1 x USB-A. Charge multiple devices at once. GaN technology allows for smaller size, more power, and longer service life. Input: 100–240 V ~ 50/60 Hz 1.5 A.
