Arlo Bollard

ARLO SOLAR BOLLARD BLACK

Description of product family

A bollard luminaire with a solar cell, dusk switch and motion sensor. Height: 85 cm. Shines light downwards. On the basic setting, the luminaire lights up with a luminosity of 75 lumens as the light of the day wanes. On the second setting, the motion sensor is activated and the luminosity jumps to 400 lumens when it detects movement and then goes back down to 75 lm. On the third setting, the luminaire only lights up when it detects movement (at 600 lm) and turns off again after a moment. Change between the different lighting modes by pressing the on/off switch for 1-3 seconds. Use together with the Arlo wall luminaire for a stylish lighting solution. Bright LED, non-replaceable. The body of the luminaire can withstand sunlight and maritime environments without fading. Made of black-hued stainless steel. Mounting screws and ground spike included.
