Vilma

VILMA DEER RGB LED

LED Figure

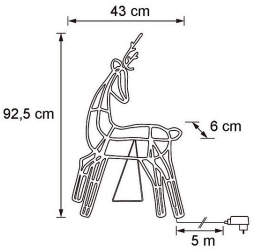

Description of product family

A lightweight metal frame shaped like a standing deer. The frame is wrapped with copper-coloured LED wire and decorated with acrylic that refracts light beautifully. Place the product standing against a wall or use the included stand. Available with warm white lighting or in a multicolour version. The multicolour version features eight lighting modes, selected by pressing the button on the transformer. Pressing and holding the button activates the timer. The warm white version has a timer function only. The timer is active when the green indicator light on the button is illuminated.

Technical details

Vilma deer figure with multicolour lighting. A lightweight metal frame with a copper light string and light-diffusing acrylic. Place standing against a wall or use the included support stand. 140 multicolour LEDs, non-replaceable. Size: L 43 cm, D 6 cm, H 92.5 cm. Transformer: IP44 GS 4.5 V 3.6 W, included. The transformer has a button allowing selection of eight different lighting modes. Holding the button activates the timer: 6 h on and 18 h off. The timer is active when the button glows green. Clear cable, 5 m. Suitable for indoor and outdoor use.
