Flex Multi

Flex Multi IP20 16W 830/840/865 DIM

Downlight

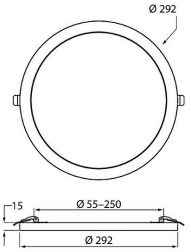

Description of product family

Flex Multi is a dimmable panel luminaire that is suitable for dry spaces in residences and public properties. Lightweight surface or semi-flush mounting. Before installation, choose the temperature of the light out of three options: 3000 K, 4000 K or 6500 K. The advantages of the Flex Multi series are both the very thin build and the adjustable spring mounting, which allows the luminaire to fit into almost any pre-made recess (55-250 mm) depending on the size of the product. The adjustability of the slot combined with the thin frame makes this light fixture the perfect choice for renovation sites. Available in three different sizes and wattages. PIR model also available.

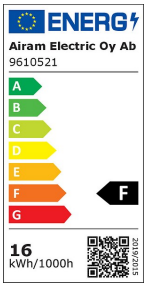

Technical details

Dimmable panel light for dry indoor areas, Ø 292 mm. IP20/IP20. Lightweight surface or semi-recessed installation. Features an extremely low-profile construction and an adjustable spring-loaded clip that allows you to fit the light into an existing recess (55–250 mm). Fixed connecting cable.
