Avira

Avira L IP20 42W CCT DIM REMOTE WH

Panel luminaire

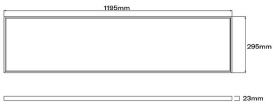

Description of product family

Avira is a versatile panel luminaire for general lighting in the home or small office. The product family contains panel luminaires in three different sizes: the square-shaped Avira S (295 x 295 mm), the rectangular Avira M (295 x 595 mm) and the long Avira L (295 x 1195 mm). The luminaire can be dimmed using the included remote control, and the colour temperature can also be adjusted. Stepless adjustment is carried out using the K+/K- buttons, while the colour temperature can be adjusted in steps (2700 K / 4000 K / 6500 K) using the circular arrow button. Surface mounting. The power supply has a wire to which the wires coming from the ceiling are connected.

Technical details

Avira L is a panel luminaire for lighting dry indoor spaces in the home. IP20. Size: 295 x 1195 mm. Comes with a remote controller for dimming the light and adjusting its colour temperature (2700 K - 4000 K - 6500 K). Edge lighting highlights the low structure of the frame. Fixed 42 W LED.
